

Key Fact Sheet

BOSTITCH

We Design Fastening Solutions

Bostitch Model P6 *Power Clench*[™] Stapling Plier

Bostitch has re-engineered its line of plier staplers using state-of-the-art, patented technology to achieve unsurpassed performance. The Model P6C *Power Clench*[™] plier stapler is designed for heavier materials like padded shipping bags and corrugated.

Features / Benefits

You've got to squeeze it to believe it!

Ergonomic Design

The model P6C *Power Clench*[™] Plier Stapler was designed with the help of operators and ergonomic specialists to insure the best possible design.

Patented Bearing System

This unique, new bearing system assures smooth, *Easy Squeeze* action across the entire operating sequence, creating a tighter clinch, in less time, with reduced operator strain.

Smooth-Action Magazine Cover

Teflon coated magazine cover creates a smooth, non-stick action that permits faster loading of staples.

Top Loading

Staples can be loaded quickly while holding the tool in a normal position. Just drop one stick of staples into the magazine close the cover and your back in business. It's that simple.

Medium or Heavy Wire

Machines are available to drive either medium or heavy, flat wire in either 1/4" or 3/8" leg lengths to fit your application.

P6C-8P pointed blade penetrates carton to clinch staple.
