Stanley-Bostitch Model P6C *Power Clench*TM Air Drive Stapling Plier

*Stanley-Bostitch has re-engineered its line of plier staplers using state-of-the-art, patented technology to achieve unsurpassed performance. And the Model P6C **Power Clench**TM plier stapler is now available as an air drive unit for optimum ease of operation.*

Features / Benefits

Ergonomic Design

The **Power Handle** air cylinder and extended trigger maintain the integrity of the stapler's overall ergonomic design. That means less strain for the operator.

Helps Reduce Repetitive Motion Problems

Although the plier stapler features **Easy Squeeze** action, the Air Drive **Power Handle** attachment allows the operator to use the machine continuously, without unnecessary stress.

Machine Mount Option

The model JB600 can be configured as a machine mounted stapling head and operated with a remote trigger valve for the optimum high production and performance.

Smooth-Action Magazine Cover

Teflon coated magazine cover creates a smooth, non-stick action that permits faster loading of staples.

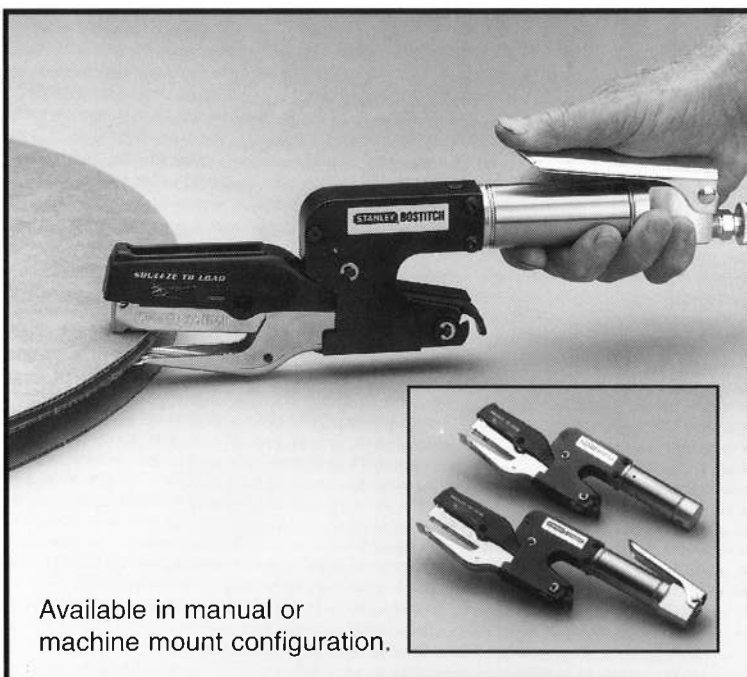

Top Loading

Staples can be loaded quickly while holding the tool in a normal position. Just drop one stick of staples into the magazine, close the cover and your back in business. It's that simple.

Medium or Heavy Wire

Machines are available to drive either medium or heavy, flat wire staples in either 1/4" or 3/8" leg lengths ...to fit your application.
