

## MCS19-437 Wide Crown Carton Stapler

### Features:

- Single adjustment clinch control.
- Seals filled cartons entirely from the outside.
- Complete with a staple remover.
- Easy rear loading.
- Comfortable rubber grip.

This heavy duty stapler is designed for fastening flaps of corrugated cartons, working entirely from the outside. It uses 34.5mm wide crown pre-formed staples of heavy 1.80mm x 0.90mm wire in either liquor or galvanized finish.

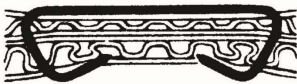

The MCS19-7437 has a cast aluminium body, enclosed front and back for operator safety and a heavy gauge steel magazine with spring-loaded staple pusher. Wearing surfaces are hardened for smooth operation and long life.

The MCS19-7437 is a hand operated stapler for top sealing regular slotted, full overlap, partial overlap, end flap and practically any other kind of corrugated carton.

Ideal for packaging applications where the stapler must be taken to the work. A few wide-crown staples driven across the seam of a regular slotted carton provides a time saving method of carton closure. Stapling produces an instantly secure seal as opposed to waiting for adhesive to dry if glue is the chosen method of fastening.

A simple adjustment controls penetration of clinchers and tightness of the clinch. This ensures a properly clinched staple with the correct amount of compression of the board.

### Actual Size

#### Maximum penetration

Staple driven completely through two thicknesses of corrugated and clinched on underside.

#### Blind clinching

Easily adjustable for "blind clinching" within two thicknesses of board.

One simple adjustment controls staple penetration. With this feature you are always assured of the desired staple penetration depth.

### Specifications:

Length:	375mm
Height:	288mm
Width:	115mm
Weight:	1.9kg
Staple Capacity:	100 staples per load

### MCS19-7437 uses the following staples:

Staple Code	Box Quantity	Length
SW7437-15MM	2,000	15mm
SW7437-18MM	2,400	18mm
