HT-R Tapener

Zero waste Tape binding

Features:

- *Light-weight and easy to use*
- *20% lighter than HT-B model*
- *Time saving tool*
- *No 'scrap'- uses less tape*

This tool is ideal for training vines and plants that grow rapidly and need to be kept off the ground. Used by growers of many types of produce such as grapes, kiwifruit, tomatoes, cucumbers, nursery saplings and many more.

The HT-R is designed to tie the plants stem or branch to a retaining wire or string using a non adhesive, coloured, bio-degradable tape, which is then fastened with a small staple.

The unique action of the tape binding tool makes it compact and easy to use.

The bio-degradable tape is available in different colours for the colour coding of nursery stocks and identifying different varieties of plants and fruit trees.

The HT-R tape binder is designed to make the job of tying plants faster and easier.

Specifications:

Staple Capacity :	172
Length:	353mm
342mm	148mm
Height:	35mm
	420g
