NEW!

Pneumatic stapler for Polymer staples

Features:

- Eliminates damage to bits, cutter blades & belts
- Eliminates wood discolouration
- Added holding power
- Contact trip mechanism

Just what the timber industry has been asking for, a tacker that uses polymer staples to label both logs and sticks of timber.

The 82PS pneumatic tacker, using polymer 82P/10 10mm staples, is designed to eliminate damage to bits, blades, cutters and sanding belts when the timber is being processed.

Polymer staples have the added advantage that they will not rust, bleed or stain timber. They can be used in virtually any environmental conditions without adverse effect - they won't shatter, melt or fall apart.

Staples feature a full 13mm crown which gives good holding power to labels or wrapping being fastened to timber.

The 82PS air tacker features a convenient bottom loading magazine with easy release and is light-weight for better manoeuvrability.

82PS drives the following polymer staples:

Staple Code	Box Quantity	Length
82P/10	5040	10mm
